# In your journal

What does your ideal home look like, and how much would it cost to live there each month?

What do your meals look like, do you desire to eat out more often, how much would you spend each month?

What clothes do you wear and how much do you need to budget each month for them?

What does your car look like, and do you need more than one, how much would you spend each month for your vehicles, the maintenance, gas and insurance?

What do you do for recreation and where do you travel, and how much each month do you need to set aside for this?

What would be the cost of your life insurance premiums each month?

What is the amount that is being added to your savings program each month?

List whatever else would be in your budget, then add it up.

What is the monthly income you need to live this way?
